

# Food web shuffle Handout 4

Who eats who? Students will put the organisms in the right position of the food web and make the right connections. How are they interconnected?

A large, light blue rectangular area with wavy top and bottom edges, intended for students to draw or write their food web connections. The top edge is irregular, with two light orange shapes protruding upwards, suggesting a horizon or ground level. The bottom edge is also irregular, with a dark grey shape protruding downwards, suggesting a ground or water level.
